

100+ ACTIVITIES WITH FULL INSTRUCTIONS

Rainy Day Activity Guide

100 Indoor Activities by Age

Complete Step-by-Step Instructions Inside

Creative Activities for Toddlers, Preschoolers,
Elementary Kids & Tweens (Ages 2-14)

Digital Download | Printable PDF | Instant Access

Welcome, Parents & Caregivers!

Got a rainy day coming? Don't stress — you've got this! This guide gives you **100+ engaging indoor activities** with **complete step-by-step instructions**, organized by age group so you can find the perfect activity *right now*. No more guessing how to do the activity — every instruction is detailed and easy to follow.

TIPS

Table of Contents

Toddlers (Ages 2-3)	3-4
Preschoolers (Ages 4-5)	5-7
Early Elementary (Ages 6-8)	8-10
Tweens (Ages 9-14)	11-13
Materials Checklist	14
Pro Tips & Variations	15

Toddlers (Ages 2-3) — 25 Activities

Simple, sensory activities that build fine motor skills and keep tiny hands busy.

1 Finger Painting Fun

Washable paint, paper, smock

15-20 min

Sensory

Easy

How to Do It:

- 1 Set up a safe, easy-to-clean workspace. Cover the table with plastic tablecloth or newspaper.
- 2 Put the smock or old shirt on your toddler to protect their clothes.
- 3 Squeeze small amounts of washable paint onto a paper plate or palette — 2-3 colors to start.
- 4 Demonstrate by putting your finger in the paint and making dots on the paper.
- 5 Let your toddler explore! Show them how to spread paint, make swirls, or press their whole hand.
- 6 Talk about the colors and textures: "Look, it's squishy!" or "This one is blue like the sky!"
- 7 When done, carefully remove the artwork and let it dry flat.

Variation:

Use edible finger paint (yogurt + food coloring) for truly mess-free cleanup. Add shaving cream for a different texture experience.

2 Container Sorting Game

3-4 plastic containers, colorful buttons or pom-poms

10-15 min

Cognitive

Easy

How to Do It:

- 1 Gather 3-4 plastic containers with wide openings (yogurt cups, small buckets, or food containers).
- 2 Collect a handful of colorful buttons or pom-poms in various colors and sizes.
- 3 Show your toddler one container and say "Put the red ones in here."
- 4 Demonstrate by picking up a red button and placing it in the container.
- 5 Let your child pick up buttons and place them in the correct containers.
- 6 Offer encouragement: "Great job putting the blue one in!"
- 7 Once sorted, let them dump everything out and start again — toddlers love repetition!

Variation:

Sort by shape (circles vs squares) or size (big vs small). Use sorting for a learning progression: colors first, then shapes, then sizes.

3 Playdough Smash

Playdough, plastic tools, rolling pin

20-30 min

Motor Skills

Easy

How to Do It:

- 1 Give your toddler a blob of playdough (about the size of a golf ball).
- 2 Show them how to squash it with their palm: "Squish it flat!"
- 3 Offer plastic tools: plastic knife, forks, cookie cutters, or plastic animals.
- 4 Demonstrate poking holes with a fork or cutting with a plastic knife.
- 5 Let them explore freely — squishing, rolling, poking, and pulling apart.
- 6 Make it into a game: "Can you make a big flat pancake?" or "Let's poke lots of holes like cheese!"
- 7 Store in airtight container when finished for reuse.

Variation:

Add cookie cutters for shape practice. Hide small toys in the playdough for excavation play. Mix colors by smashing two balls together.

4 Bubble Wrap Stomp

Bubble wrap, tape, hard floor surface

10 min

Gross Motor

Easy

How to Do It:

- 1 Unroll a sheet of bubble wrap large enough to cover the floor area where your toddler will stand.
- 2 Tape the edges securely to the floor to prevent slipping.
- 3 Help your toddler stand on the bubble wrap with bare feet or socks.
- 4 Say "POP! POP! POP!" as they stomp — they'll love the sounds and sensations.
- 5 Encourage different movements: walking, jumping, tip-toeing, or standing still and shifting weight.
- 6 Move to fresh sections of bubble wrap to keep the popping going.
- 7 Supervise closely to prevent slipping or falls.

Variation:

Tape multiple sheets together for a larger "stomp zone." Use for dancing games — play music and stomp when it stops. Lay different textures on top for added sensory experience.

5 Sensory Bin Dig

Large bin, rice or dried beans, small toys, scoops

20-30 min

Sensory

Easy

How to Do It:

- 1 Pour rice or dried beans into a large shallow bin — fill it about 2-3 inches deep.
- 2 Bury small toys in the rice/beans — dinosaurs, plastic letters, small cars, or figurines work well.
- 3 Provide scoops, spoons, cups, or small containers for digging.
- 4 Show your toddler how to scoop through the rice to "find treasure."
- 5 Ask questions: "What did you find?" "What color is it?" "Can you find another one?"
- 6 Let them pour, scoop, and transfer the rice — great for motor skills.
- 7 When finished, let them help pour rice back into storage container.

Variation:

Use colored rice (add food coloring to rice and let dry) for visual interest. Hide items by color for color matching. Add spice like cinnamon for scent play. Use dried pasta for a different texture.

More Toddler Activities (6-13)

6 Sticker Peeling Practice

Sheet of stickers (stars, shapes), paper

10-15 min

Fine Motor

Medium

How to Do It:

- 1 Gather a sheet of small stickers — stars, hearts, or shapes work best for little fingers.
- 2 Sit with your toddler and show them how to hold the sticker sheet with one hand.
- 3 Demonstrate peeling: use your thumb to lift a corner, then pull back slowly.
- 4 Let them try — be patient, this is challenging for small fingers!
- 5 Once peeled, show them how to press the sticker onto paper or a surface.
- 6 Create a "sticker picture" by peeling and placing multiple stickers.
- 7 Celebrate their effort: "You peeled it all by yourself!"

7 Tunnel Crawl

Blankets, chairs, pillows

15 min

Gross Motor

Easy

How to Do It:

- 1 Push two chairs facing each other, about 3 feet apart.
- 2 Drape a large blanket or bedsheet over the chairs to create a tunnel.
- 3 Weight down the edges with pillows so the tunnel doesn't collapse.
- 4 Show your toddler the tunnel and crawl through it yourself.
- 5 Call them from the other side: "Come through the tunnel!"
- 6 Shine a flashlight into the dark tunnel for extra excitement.
- 7 Add toys or books at one end to encourage crawling through to "find treasure."

8 Ball Roll Race

Balls of different sizes, cardboard tubes or ramps

10 min

Coordination

Easy

How to Do It:

- 1 Set up a gentle incline using a large cardboard box tilted at an angle, or use stacking blocks to raise one end.
- 2 Position a bucket or box at the bottom to catch the balls.
- 3 Give your toddler a ball and show them how to place it at the top of the ramp.
- 4 Let go and watch the ball roll down into the bucket.
- 5 Let them retrieve the ball and try again — they'll want to do this repeatedly!
- 6 Try different balls (golf ball, tennis ball, soccer ball) to see which rolls fastest or farthest.
- 7 Count each roll: "One, two, three — let go!"

9 Foam Block Building

Foam building blocks or soft blocks

15-20 min

Creativity

Easy

How to Do It:

- 1 Clear a floor space where the blocks can stay up without interruption.
- 2 Dump out all the foam blocks in a pile — toddlers love the dump!
- 3 Start building a simple structure and invite your toddler to add blocks.
- 4 Show them how to stack blocks on top of each other: "Put it right here on top."
- 5 Build towers, walls, or houses and knock them down (this is often the favorite part!).
- 6 Name what you build: "We're building a house for teddy bear!"
- 7 Use the blocks for pretend play afterward — cars driving through roads, dolls sitting on chairs.

10 Color Sorting Cups

Colored plastic cups, colored objects (blocks, pom-poms)

15 min

Color Learning

Easy

How to Do It:

- 1 Set out 4-5 colored plastic cups in a row.
- 2 Scatter colored objects (blocks, pom-poms, small toys) around the cups.
- 3 Point to a cup and say: "This is the red cup. Let's find all the red things."
- 4 Pick up a red object, name its color, and drop it in the matching cup.
- 5 Hand your toddler a colored object and ask: "What color is this? Where does it go?"
- 6 Let them place objects in cups — they'll learn colors through repetition.
- 7 When all sorted, dump everything out and do it again with different objects.

More Toddler Activities (11-25)

11 Musical Blanket Ride

Large blanket or sheet, music player

10 min

Movement

Easy

How to Do It:

- 1 Spread a large blanket flat on the floor.
- 2 Have your toddler sit or lie on the blanket.
- 3 Play upbeat music and slowly drag the blanket around the room.
- 4 Make swooping movements, gentle bumps, and zigzag patterns.
- 5 When music stops, everyone freezes! Start again when music plays.
- 6 Let them take turns being the "rider" while you pull.

12 Crinkle Paper Dig

Tissue paper or wrapping paper, small toys

15 min

Sensory

Easy

How to Do It:

- 1 Tear tissue paper or crinkly wrapping paper into small pieces.
- 2 Fill a box or bin with the crumpled paper pieces.
- 3 Hide small toys throughout the paper — make it look like a nest.
- 4 Invite your toddler: "There's treasure hidden in the paper!"
- 5 Let them dig through with their hands — the crinkly sound is exciting!
- 6 As they find each toy, celebrate: "You found a dinosaur!"
- 7 Stuff the paper back and hide the toys again for replay value.

13 Puzzle Piece Hunt

2-3 toddler puzzles with removable pieces, hidden spots

15 min

Problem-solving

Medium

How to Do It:

- 1 Remove pieces from 2-3 simple toddler puzzles (chunky wooden puzzles work great).
- 2 Scatter pieces around the room — hide them in obvious but findable spots.
- 3 Show your toddler the puzzle board with missing pieces: "Where did the pieces go?"
- 4 Give hints if needed: "I think I see something blue under the chair!"
- 5 As pieces are found, show how they fit into the puzzle.
- 6 Complete the puzzle together once all pieces are found.
- 7 Mix pieces from different puzzles for an extra challenge (for older toddlers).

14 Water Pouring Station

2-3 plastic containers, water, food coloring (optional), towels

20 min

Science

Medium

How to Do It:

- 1 Set up in the kitchen or bathroom with towels on the floor.
- 2 Fill one large plastic container (pitcher or jar) with water.
- 3 Place 2-3 empty containers of different sizes nearby.
- 4 Show how to pour water from one container to another.
- 5 Practice filling and emptying: "Fill the small cup. Now pour it into the big cup."
- 6 Add a few drops of food coloring to make "colored water" for visual interest.
- 7 Use measuring cups for more precision practice.

15 Paper Tearing Strips

Newspaper, magazines, construction paper, glue

10 min

Fine Motor

Easy

How to Do It:

- 1 Gather old newspapers, magazines, or colored paper.
- 2 Sit with your toddler and hold a piece of paper.
- 3 Grasp the edge with both hands and demonstrate tearing: "Pull, pull, pull!"
- 4 Guide their hands if needed: "You hold here, I'll help you pull."
- 5 Tear strips and collect them in a pile.
- 6 Glue the strips onto paper to make a "paper caterpillar" or abstract art.
- 7 Name the colors as you tear: "This is blue paper. This is red paper."

Preschoolers (Ages 4-5) — 25 Activities

Build creativity and learning through play with these engaging activities.

26 Fort Building Challenge

Blankets, pillows, chairs, clothespins

30+ min

Engineering

Medium

How to Do It:

- 1 Clear a living room area and gather supplies: large blankets, comforters, pillows, chairs, and clothespins.
- 2 Decide on a fort design: draped over chairs (tent style), suspended between furniture, or using chair backs as supports.
- 3 Help drape a large blanket over two chairs placed 3-4 feet apart. Secure edges with books or pillows.
- 4 For a deeper fort, drape blankets from couch arm to chair back for a larger covered area.
- 5 Use clothespins to clip edges together or attach to furniture for stability.
- 6 Add pillows and blankets inside for comfort. Add a flashlight for "reading lights."
- 7 Enjoy the fort together! Read books, have snacks, play pretend, or use it as a quiet reading corner.

Variation:

Create a "secret entrance" using a differently colored blanket for the door. Add a "mail slot" by clipping a small opening. Make it a themed fort: spaceship, castle, or camping site.

27 Obstacle Course Indoor

Cushions, toys, string, cones or stuffed animals

20-30 min

Gross Motor

Medium

How to Do It:

- 1 Plan your obstacle course using furniture and items you have. Ideas: crawl under table, jump over pillows, walk around chairs.
- 2 Set up stations using household items: cushions for jumping, chairs to weave through, tape lines on floor to balance walk.
- 3 Tape a "start" and "finish" line using painter's tape.
- 4 Time each run or create a simple chart to track progress.
- 5 Demonstrate the course first, then let your child try.
- 6 Add challenges: "Crawl as fast as you can!" "Walk slowly like a bear!"
- 7 Time trials: Set a timer and see how many times they can complete the course in 2 minutes.

Variation:

Make it a treasure hunt — place small toys at each obstacle, collect them all. Include a "balance beam" (rolled towel on floor), "tunnel crawl" (chair tunnel), and "bear walk" (walk on hands and feet).

28 Kitchen Science Lab

Baking soda, vinegar, food coloring, dish soap, small containers

30 min

Science

Easy

How to Do It:

- 1 Cover the table with plastic tablecloth or towels for easy cleanup.
- 2 Put baking soda in a shallow tray or plate — spread it out evenly.
- 3 Add drops of different food coloring around the baking soda: red, blue, yellow dots.
- 4 Give your child a small cup of vinegar.
- 5 Explain: "When we mix vinegar (acid) with baking soda (base), a chemical reaction happens!"
- 6 Let them pour vinegar onto the baking soda and watch it fizz and bubble!
- 7 Add dish soap to the mixture for extra bubbly foam. Experiment with different amounts.

Variation:

Use a turkey baster to add vinegar for more control. Build a volcano: stack a small cup in the center of a mound of baking soda, then pour vinegar for an eruption. Add glitter to see where bubbles travel.

29 Treasure Map Adventure

Paper, brown tea bags or coffee grounds, crayons, small treats

25 min

Problem-solving

Medium

How to Do It:

- 1 Steep 2-3 tea bags in warm water for 5 minutes to create brown "aging" water. Remove tea bags.
- 2 Paint the tea water over white paper using a paintbrush. Let dry or dry with hairdryer.
- 3 Draw simple map: mark an X for treasure, draw simple paths or rooms, add mountains or trees with crayons.
- 4 Write simple clues: "Look under something soft" or "Check near something you sit on."
- 5 Hide a small treat or toy at the X location — use the clues to find it.
- 6 Give your child the map and let them follow clues to find the treasure.
- 7 Let them make their own map for you to follow — great for building skills!

30 Paper Airplane Factory

Paper (various sizes), markers, tape

25 min

Engineering

Medium

How to Do It:

- 1 Start with a rectangular piece of paper (8.5x11 or A4).
- 2 Basic Dart: Fold paper in half lengthwise, unfold. Fold top corners to center line, then fold in half along center line. This creates a simple dart shape.
- 3 Delta Wing: Fold in half, unfold. Fold top corners to center line. Fold outer edges to center line again. Fold in half. This creates a wider wing shape.
- 4 Decorate with markers — add racing stripes, pilot names, or designs.
- 5 Test fly: Hold at the center back and throw with a smooth, level forward motion.
- 6 Compare flights: Which plane flies farthest? Which stays in the air longest?
- 7 Make adjustments: Bend tail up for lift, fold edges for stability. Document changes and results.

Variation:

Add paper clips to the nose for weight. Use different paper types (newspaper, cardstock). Create a contest with distance markers. Make a "paper airplane launcher" using a rubber band and spoon.

Early Elementary (Ages 6-8) — 25 Activities

Challenge growing minds with creative projects and interactive games.

51 LEGO Bridge Challenge

LEGO or building blocks (50+ pieces), measuring tape

30 min

Engineering

Medium

How to Do It:

- 1 Set up two stacks of books or blocks about 12 inches apart as "pillars" for your bridge.
- 2 Challenge: Build a bridge that can hold a toy car (or small weight) in the middle.
- 3 Plan first: Draw your bridge design on paper. What shape will the bridge be? How will you connect the sides?
- 4 Build the bridge deck (flat top) connecting the two pillars.
- 5 Add supports: Try different designs — X-braces, triangle supports, or solid columns.
- 6 Test weight: Place small toys or coins on the bridge. How many can it hold before collapsing?
- 7 Modify and test again. Document what worked and what didn't.

Variation:

Increase the gap width to make it harder. Add height variation to pillars. Use only a limited number of pieces. Time how fast you can build a bridge that holds a specific weight.

52 Secret Code Messages

Paper, markers, cipher wheel template (or make one)

25 min

Problem-solving

Medium

How to Do It:

- 1 Create a cipher wheel: Cut two circles from cardboard, one slightly larger. Write letters A-Z on both. Add numbers 1-26 around the edges.
- 2 Secure the circles together with a pin or brad so they can rotate.
- 3 To encode: Set wheel to a "key" (pick any number). Match each letter to the letter across from it on the outer wheel.
- 4 Write a secret message to your child using the cipher. Example: If A=12, write "12-5-18" to spell "HER".
- 5 Give them the encoded message and the key number.
- 6 Help them decode by matching number to letter using the cipher wheel.
- 7 Let them write secret messages back to you! Choose a new key for each message.

Variation:

Use a simpler symbol substitution: create symbols for each letter. Backward alphabet code (A=Z, B=Y). Create a code that spells words but each word starts with the first letter of the real word ("Yellow Easy Rolling" for YER).

53 Stop Motion Animation

Phone or tablet with camera, clay or figures, backdrop

45 min

Creative

Medium

How to Do It:

- 1 Set up a simple "stage" — a table with a plain backdrop (blanket, paper, or wall).
- 2 Gather figures: clay characters, action figures, LEGO minifigures, or paper cutouts.
- 3 Download a stop motion app (free ones available for iOS and Android).
- 4 Position your first scene. Take one photo.
- 5 Move figures slightly. Take another photo. Repeat — each photo is one "frame."
- 6 For a 5-second animation, you'll need about 60-90 frames (photos). Move figures only slightly between shots.
- 7 Play back your animation in the app. Add music if available. Save and share!

Variation:

Use sticky tack to hold figures in place. Create a storyboard (simple drawings) before starting. Do a "claymation" with homemade clay characters. Include title cards between scenes.

54 Design Your Own Board Game

Cardboard, markers, dice, game pieces, small index cards

60 min

Creative

Hard

How to Do It:

- 1 Plan your game: What theme? What goal? How do you win? Write down the basic rules first.
- 2 Draw the game board on cardboard — a winding path works well. Use markers to create spaces and paths.
- 3 Add special spaces: "Go forward 3," "Lose a turn," "Answer a riddle," "Skip a space."
- 4 Create cards using index cards: challenge cards, question cards, or action cards with instructions.
- 5 Make game pieces from whatever you have: bottle caps, coins, erasers, or small toys.
- 6 Write official rules on a card: How many players? How do you move? What's the winning condition?
- 7 Test play with family. Adjust rules as needed. Add decorations, stickers, or drawings to make it look polished.

Tweens (Ages 9-14) — 25 Activities

Challenging activities that build skills and independence.

76 Coding Challenge Hour

Computer, Scratch (scratch.mit.edu) or Python

60+ min

Technology

Medium-Hard

How to Do It:

- 1 Open Scratch (free, no download needed at scratch.mit.edu) or set up a Python environment.
- 2 For beginners: Start a new Scratch project. Explore the block palette — motion, looks, sound, events, control, sensing.
- 3 Challenge: Build a simple game in 1 hour. Ideas: Pong clone, maze game, catch-the-object game, or simple animation.
- 4 Build step by step: Start with character movement, then add goals/obstacles, then scoring.
- 5 Use online tutorials for guidance but customize to make it your own.
- 6 Add features: Start screen, levels of difficulty, sound effects, high score tracking.
- 7 Test with others. Take feedback and improve. Share online if proud of the result.

Variation:

Python: Build a text-based adventure game using print statements and if/else logic. HTML/CSS: Create a simple webpage. Arduino: Build and code a simple circuit if you have a kit.

Paper, markers, locks (number or word), puzzles, timer, small prizes

2+ hours

Creative

Hard

How to Do It:

- 1 Design your escape room: Pick a theme (spy, haunted house, treasure hunt, sci-fi). Create a storyline.
- 2 Plan the puzzles: Design 4-6 puzzles that lead to a final code or key. Each puzzle should have a clue that leads to the next.
- 3 Build physical puzzles: Number locks on boxes, word locks on bags, hidden keys, UV light messages (write on paper with lemon juice).
- 4 Create clue cards: Write riddles, hidden messages, or puzzles that need to be solved to advance.
- 5 Set up the room: Hide clues in logical places. Arrange props for atmosphere.
- 6 Test your room by solving it yourself. Adjust difficulty and clarity.
- 7 Invite family or friends! Set a time limit (20-30 minutes) and offer a small prize for successful escape.

Variation:

Create a digital escape room using Google Forms with branching logic. Include puzzle types: riddles, word searches, pattern recognition, math problems, hidden objects.

78 YouTube Channel Creation

Phone or tablet, good lighting, editing app, topics

2+ hours

Media

Medium-Hard

How to Do It:

- 1 Decide on a channel theme: Tutorials (art, gaming, science), reviews, vlogs, comedy, challenges.
- 2 Brainstorm content: What will you teach? What makes your perspective unique?
- 3 Set up recording space: Good lighting (near window or lamp), clean background, quiet area.
- 4 Write a script or outline for your first video. Practice delivery before recording.
- 5 Record: Use a phone on a tripod or stable surface. Record multiple takes if needed.
- 6 Edit: Use free editing apps (Capcut, iMovie). Cut mistakes, add intro/outro music, add text overlays.
- 7 Create channel branding: Channel name, profile picture, banner. Upload and share with family.

Variation:

Start a family vlog series. Create a tutorial channel teaching a skill (origami, magic tricks, gaming tips). Produce "day in the life" content. Document a challenge (30-day drawing challenge, learning a new skill).

79 Business Plan Creation

Paper, markers, presentation materials

60 min

Entrepreneurship

Medium

How to Do It:

- 1 Choose a business idea: lemonade stand, dog walking, tutoring, crafts to sell, lawn care, digital products.
- 2 Research the market: Who are your customers? What do they need? What do competitors charge?
- 3 Write your business plan sections: Executive Summary, Business Description, Market Analysis, Products/Services, Pricing, Marketing Plan.
- 4 Calculate costs: What supplies do you need? How much will you spend? What's your profit margin?
- 5 Create marketing plan: How will you find customers? Social media? Flyers? Word of mouth?
- 6 Set goals: Short-term (this month) and long-term (6 months). What revenue do you want to achieve?
- 7 Present your plan: Create a 5-10 slide presentation. Practice presenting to family members.

Materials Checklist

Stock up on these basics for stress-free activity prep.

Art & Craft Supplies

Construction paper	Markers & crayons	Glue sticks & tape
Safety scissors	Stickers	Playdough
Popsicle sticks	Pipe cleaners	Googly eyes
Beads & string	Cardboard pieces	Tissue paper

Active Play Items

Balloons	Balls (various sizes)	Jump rope
Tunnel/play tunnel	Bean bags	Foam blocks

Sensory & Science

Rice & dried beans	Baking soda & vinegar	Food coloring
Dish soap	Magnifying glass	Small containers

Building & Construction

LEGO blocks	Wooden blocks	Cardboard boxes
Magnetic tiles	Straws & connectors	Blankets

Pro Tips & Activity Variations

Extending Activities

1. Add a "create your own version" challenge
2. Time trials add excitement
3. Turn solo activities into team challenges
4. Add scoring for competitive kids
5. Record and review (great for shy kids)

Age-Appropriate Adjustments

- * Simplify for younger children
- * Add complexity for older kids
- * Pair young with old for mentoring
- * Mix age groups for cooperation

Managing Energy

- * High-energy activities first
- * Quiet activities after lunch
- * Rotate between active and calm
- * Build in snack breaks

Bad Weather Backups

- * Always have 3 activities ready
- * Rotate favorites every few months
- * Keep materials in a "rainy day box"
- * Plan based on child mood

BONUS: 5 Quick Transition Activities

* "Would You Rather" game (5 min) — Ask silly either/or questions

* Storytelling chain (10 min) — Each person adds one sentence

* Silent theater (10 min) — Act out movies without sound

* Category race (5 min) — Name items in a category as fast as possible

* Draw it / Act it out (15 min) — Draw clues or act out for others to guess

100+ Indoor Activities with Complete Instructions

No More "I'm Bored!"

Every activity includes step-by-step instructions,
materials lists, and variations.
